My head in the clouds just as the silver trip is bending I'm watching the dolphin and the way that it is wending don't try to come up too fast just as your heart is mending but then the dream is shattered and the spiral's ending

Building little tombs, bashing flies with spoons squashing spiders too, let's go to the zoo daddy's coming soon, he just left the moon thunder's sonic boom, gave to me this tune

Making love with a spermwhale but it's time to go now going deeper that Asia up to Navajo now my head's full of mischief like Pandora's box now if you want to get in you'll have to cut my locks now

My desire takes me higher, electricity makes you look so pretty please don't get upset, I like getting wet zooming like a jet is a marmoset

So take me by the hand and tell me that you love me take me by the hand and tell me that you love me take me by the hand and tell me that you love me take me by the hand and tell me that you love me
