Family of Noise

Adam Ant

A lot of people in this great big-world Say "love everybody" A lot of people busy busy busy busy Being very modern

But the family of noise is here And it's come to save everybody The family of noise is here And it's come to save you and me It goes:

The family of noise is here
And it's come to save everybody
The family of noise is here
And it's come to save you and me

A lot of people in the ancient world They loved only quiet And then along came the machine And a new direction

The family of noise is here
And it's come to save everybody
The family of noise is here
And it's come to save you and me
It goes:

In the morning
Last thing at night
In the darkness
Standing in the light

A lot of people in this great big world Just searching for the "pure" sound They're just looking to the machine They don't listen to the noise

The family of noise is here
And it's come to save you and me
