

Light It Up

Behind Enemy Lines

Immersed in political strategies
Government policies create endless catastrophes
And we all pay the price
When our movement becomes stagnant, anchored by apathy
We can't just give up, we can't just give in
There are no wasted attempts when it comes to action
The smallest act could cause a chain reaction
That could bring this entire system down
Light it up
Ignite a spark
Every single action could be the start
Light it up
Ignite a spark
It will take all of our efforts to get out of the dark
You could be the one
That offers hope and inspiration
To everyone who feels defeated
And moves the depleted towards motivation
And helps the flame continue to burn
The most important thing that we still need to learn
Is that we're in this together, don't shut out one another
Don't ever forget that we depend on each other
Light it up
Ignite a spark
Every single action could be the start
Light it up
Ignite a spark
It will take all of our efforts to get out of the dark
