

I Think She Likes Me

Billy Gilman

I think she likes me
And I know I like her
It's kind of frightening
'Cause it's too soon to be sure
I think she likes me
Maybe even might be love

Should I be patient
Or should I ask her straight out
That smile she gave me
Don't leave too much room for doubt
I think she likes me
Maybe even might be love

Our first kiss said more than good night
I bet I've relived it a thousand times
I can't predict what the future's gonna bring
But those looks that she's been giving me
Can only mean one thing

I think she likes me
I think she might be the one
And more than likely
The best is still yet to come
I think she likes me
Maybe even might be love

[Repeat bridge]

[Repeat first verse]
