I Think She Likes Me

Billy Gilman

I think she likes me And I know I like her It's kind of frightening 'Cause it's too soon to be sure I think she likes me Maybe even might be love

Should I be patient Or should I ask her straight out That smile she gave me Don't leave too much room for doubt I think she likes me Maybe even might be love

Our first kiss said more than good night I bet I've relived it a thousand times I can't predict what the future's gonna bring But those looks that she's been giving me Can only mean one thing

I think she likes me I think she might be the one And more than likely The best is still yet to come I think she likes me Maybe even might be love

[Repeat bridge]

[Repeat first verse]
