

## Did You Drive

Blow

Was the air so hot Was there an ocean of crackling ice  
You're all ice  
What got inside  
Did you find the thought?  
And did you guess it right  
Were you in it nearly all of the time?  
And did your blood run through like orange juice  
And did you find yourself there  
And did the clothes that you wore surround you like a  
cloud  
And did you get the chance to float?

Was the air so hot  
Did you look up and see light in the sky  
And did you drive right through  
Make a streak through every night  
And did you feel the flow  
Did you feel the flow?  
Can you feel it still?  
Did you bring some home? Did you go?  
Did the people bump against you  
And surround you like a cloud  
And did you see right through?  
And did you look into a mirror that was foggy with a  
cloud  
And did you find your same old self?
