

Still Standing (Demo 2009)

Blutengel

I watch you while you're sleeping
Every night I'm here with you
I try to protect you
From the ghosts inside your dreams
I try not to break the silence
I am just the watcher
Every night you're growing older
And eternity awaits

And the sun will rise again
I'm still standing here with you
We watch the years passing by
And our souls will fade to gray

And the sun will rise again
I'm still standing here with you
We watch the years passing by
And our souls will fade to gray
