Gone Too Far

Dan Fogelberg

World spinning out of control The odds diminish every die we roll But we are still in the game If we should lose there's only us to blame

Or have we gone too far Am I just wishing on a dying star Oh tell me have we gone too far

Look 'round you, what do you see Six billion people where there's room for three And so many mouths go unfed Oh Father give us all our daily bread

Or have we gone too far Are we just wishing on a dying star Oh tell me have we gone too far

Each year we find newer ways To turn this planet into empty space So close now to zero ground We've got to find a way to turn it 'round

Or have we gone too far Are we just living on a dying star Oh tell me have we gone too far

Or have we gone too far Are we just wishing on a dying star Oh tell me have we gone too far
