

## Burn

## Defiance

you rich fucking scumbag your gonna get a brick  
because your life style is the anchor that sinks us in the shit  
you have cars worth more than houses, but that isn't enough  
your life is based on property and wealth you stole from us  
invested. gentrifying our neighborhoods and town  
while sucking the life out of everything you touch  
the problem is so fucking clear, the solution so plain to see  
and the fucker hanging for the noose will be you not fucking me

your gonna witness vengeance you cannot comprehend  
lifetimes of robbing us will get you in the end  
our anger has been brewing, fewer options left to choose  
watch your fucking backs when we attack there's nothing left to  
lose

we fought your arrogance with notes that came on bricks  
smashed your shiny shop fronts up and bashed your car to bits  
but your stupid fucking media let loose a river full of shit  
and tried to drown us all and minimize what we had taken bit  
by bit  
of course they would protect your wealth at any cost  
but when they labeled our attacks racist they had it fucking wrong  
were fed up and full of hatred but it won't be misdirected  
if your poor you're fucking poor but if your rich you'll fucking  
get it

you stupid fucking parasite you got you got your fucking brick  
and there is a million more waiting to sink you into shit  
from the start of time you've raped and robbed yourself right t  
o the top  
refused to see the lives it's cost to get where you are  
ignored the agony of those who've suffered from your greed  
and most of all your lives have made our lives a living hell  
so now is the time to get revenge and see the tables turn  
we'll torch your cars and houses and then we'll watch you fucki  
ng burn
