Hand Held In Black And White

On a ticket Tokyo return Colour evening palaces that burn Some expression leading to the sky They will wait until you learn to fly Chorus Hand held in black and white Into the northern light Fly like a silver wing higher Catching the southern wind Gliding and other things Fly like a silver wing higher Inner visions written on the wall In graffiti winner takes it all Take a chance and put your money down We will race you high above the ground Repeat chorus Inner visions written on the wall In graffiti winner takes it all Take a chance and put your money down We will race you high above the ground Repeat chorus to fade
