

Curse of Darkness

DragonForce

Here I stand
No one will ever reach my pain
Blood is the answer
Until the end
I fight for my life and I never will surrender
Vengeance is mine
Driven by sorrow and eternal hatred
Blood legacy
Hear my endless cry

Shattered dreams
I am the shadow of the man I used to be
But I know tonight
Your pain will be my delight
Hear the symphony
From the score of the damned
Unleashing the eternal fire

Ride on your way
This is your curse of darkness
Ride through the night and one day you'll be free
Look to the sky where our heart's burning bright
Hear the laments of innocents rise

All alone
I am lost in the maze of hearsay
Only a nightmare
Torn within
Battle so far til I die
For centuries
Just like the king of everyone trapped for eternity
Heart and soul
I have the force to slay your kind

Ride on your way
This is your curse of darkness
Ride through the night and one day you'll be free
Look to the sky where our heart's burning bright
Hear the laments of innocents rise

As I look to the stars
I feel your presence in my heart
How I wish I could hear your voice again
Like my tears in the night
Your memory's still shining bright
On this lonely road I ride
Wandering through the circles of hell

Ride on your way
This is your curse of darkness
Ride through the night and one day you'll be free
Look to the sky where our heart's burning bright
Hear the laments of innocents rise

(Ride on your way
This is your curse of darkness
Ride through the night and one day you'll be free)

Look to the sky where our heart's burning bright
Hear the laments of innocents rise
Hear the laments of innocents rise
