

Protection

Embrace

It wasn't perfection I was expecting when I met you
It's nearly midnight, girl, when the clock strikes, what do you
turn back to?
And if I got used, it's all that I wanted, all that I wanted
For all that I knew I needed protection, now I need protection
From you

Hung out on your friends list to see who you went with and how
they know you
Sent token gestures to serial texters in capital letters, the l
ouder the better
You come for my queen, you better be loaded, create an explosio
n
The second you miss, you'll need protection, there'll be no pro
tection

The broken mirror's not reflecting part of me
Can't see the future but I know it's got its eye on me
Cause you're all that I need and that's all as my world comes c
rashing down
When you're out of my reach

I've seen the future, everyone's older and nobody's there for y
ou
You spin off the rails chasing your tail as everything fails, d
o you want all the details?
I'm coming for you, changing your routine won't help you elude
me
You'll never find proof, find some protection, cause you'll nee
d protection

The broken mirror's not reflecting part of me
Can't see the future but I know it's got its eye on me
Cause you're all that I need, and that's all as my world comes
crashing down
When you're out of my reach
