(The river must flow)
I love you, you're the one that I adore
And no man could love you more
It's like a river that flows to the sea

I need you like the jasmine needs the rain Let your water cool my pain Just like a river that flows to the sea

Through love I will find the meaning of you All my natural dreams will come true It's like a river that flows to the sea

Through love I will find a meaning in life But the rain must fall down tonight And like a river that flows to the sea

Oh yeah, the river must flow from me (The river must flow)
From me (The river must flow)

You're a falling star burning in my heart

Through love I will find the meaning of you All my natural dreams will come true It's like a river that flows to the sea

Through love I will find a meaning in life But the rain must fall down tonight And like a river that flows to the sea

Oh yeah, the river must flow from me
(The river must flow)
From me
(The river must flow)
(The river must flow)
(The river must flow)
From me (The river must flow)
From me (The river must flow)
