

# Courageous

Glenn Hughes

I see you have a mystical connection I hear your voice, it's haunting me  
You know the body is weak, where do I belong You never left a '68 daydream  
I hear they made your movie in June Now all the kids goin' downtown  
Are singing your song

There comes a time to learn and digest it I sacrifice all my patience  
To be like you

I can see that you're justified And I get your point of view

You're courageous You are strong You're courageous All along  
Turn the pages Brand new dawn You're courageous Your time has come

You do believe in lovin' your brother I can see you found a new way  
All you want is to keep it a simple thing You always had habitual attention  
It's all because you live day to day And you receive the colours that love will bring
