

Hi-Lo what does it mean
Another word for temperature, followed by degree
I know it may sound simple
But when I look in your eyes
Degrees of separation is what I find

You lie, I try, you lie, I try!

You lie from the center, distracted by everyone
Cause everything revolves around you
Not saying that I'm better
But when I look in your eyes
Degrees of separation is what I find

You lie, I try, you lie, I try

Time's up, I won't lie
Your whole life is a fuckin' lie
You fake, but me I stay true
Flags up, wave 'em high
The grass is greener, on the other side
My mistake was ever meeting you

Hi-Lo what does it mean
Another word for temperature, followed by degree
I know it may sound simple
But when I look in your eyes
Degrees of separation is what I find

You lie, I try, you lie, I try
