It started off alright We'd go out Friday night And have a drink and do whatever made us feel alright We'd stay out all weekend Try taking everything But never hurt no-one and so what You only live once - i thought 'Till I got caught That weren't enough for you You'd go out Monday too And Tuesday, Wednesday, Thursday 'till it all caught up with you You're everyone's best friend 'Long as they've got something I did not know you no more Heartbreak - a sickness i can't see Oh-no-no-no-no-no Feltham is singing out Feltham is singing out Tonight a light's gone out 21 years old and out Feltham is singing out We all went out one night You got us in a fight You owed some money To a monkey who had seen you right You sold your furniture So you could pay him off They cut the power Can't afford it you slept on the floor You can't hold down a job So then you had to rob First from your mom and then your friends and then the local shop But as a criminal You're just no good at all You got your collar felt So dumb, you thought about skipping bail Now you're in jail Feltham is singing out Feltham is singing out Tonight a light's gone out 21 years old and out Feltham is singing out You don't like prison life You loved to watch the sky And you get beat and injured End up throwing up all night You could not take no more So when they closed the door Tied up your sheets - strang yourself up And then you were no more, no more

Every day i,i,i see your face

As i walk on by past that awful place 23 hours in a cell Each and every day just locked up living hell, living hell, living hell

Feltham is singing out Feltham is singing out Feltham is singing out
