

New Religion

Harem Scarem

Apologize for stupid old mistakes
Your only vice disappears without a trace
Your mystified
You can't relate
Your on your knees to follow the new faith
I'm starting my own religion
Demi Gods
They'll be none
After all demons fall we'll be done
Sink your teeth into the golden prey
You won't believe the souls we saved today
You won the prize
It's no debate
Your on your knees to follow the new faith
