

# One By One

Hootie & The Blowfish

Three  
In my family say  
"we've never been anywhere"

"to the left sea  
can we go please  
we don't care we want to  
sit and stare at it"

can we try  
to hold up our head  
feel the power of the land that we trampled once

can we go  
where you go  
we know you always need us behind

it's me it's me  
calling around looking for your reply  
let me tell you where the story  
can run to now

we came together  
we will leave here one by one  
let's go on and remember  
where we've been

aunt Inez  
from Virginia she  
makes me feel like I could be president

of all I see  
and all I dream  
in these eyes that have held so much punishment

we came together  
we will leave here one by one  
let's go on and remember  
where we've been

When she laughs  
I hold up my head  
She makes me feel like I could walk on water now

Can she go  
Where I go  
I know I'll always need her behind

we came together  
we will leave here one by one  
let's go on and remember  
where we've been
