

How do we think we are the most intellectual creature that ever  
walked the Earth,  
But we are destroying and polluting and damaging the futures of  
other species?  
How come then, this so intellectual being is destroying its only  
home?  
Because we only have the one home.

Melted down,  
We live to waste.  
Denial breathes decay.  
The vultures know  
We are running away.  
Denial breathes decay.  
We're running away.  
Denial breathes decay.  
We're running away.  
The vultures know  
We're running away.  
We never see  
We live to waste.  
We're running away.

With damnation commencing  
Those of us on our knees are in fear  
Having to pray for deteriorating humanity.  
Deteriorating humanity.  
Barren will be our soils.  
A desert of dry bones  
As we wait for rapture.  
We reap what we sold.  
We reap what we sold.  
We reap what we sold.
