

# Dystopia

## Iced Earth

Enter the nightmare  
This future does implode  
A techno city-state  
A prison, nothing more  
Rounded up like cattle  
You're forced into the trains  
Nothing that you've ever known  
Will bring you so much pain

If you try to resist me  
You'll find me inhumane  
But if you just submit  
You'll live your life a slave  
You'll love your servitude  
We'll medicate your pain  
With our technology  
We'll always keep you safe

Micro-chipped like dogs  
Their thoughts are not their own  
All that's left of human kind  
Is now in their control  
Planned out through centuries  
Patient and contrived  
Played on man's naiveté  
Gullible and blind

If you try to resist me  
You'll find me inhumane  
But if you just submit  
You'll live your life a slave  
You'll love your servitude  
We'll medicate your pain  
With our technology  
We'll always keep you safe

The nightmare unfolds before my eyes  
I will resist 'til end of time  
A spirit born free  
Has to break these chains  
We're lost, we must find our way  
We'll find our way!

They say that you're a danger  
To everything that's pure  
There are too many of you  
They're offering the cure  
Swift extermination  
If you refuse the game  
Arrested development  
Your vaccinated fate

If you try to resist me  
You'll find me inhumane  
But if you just submit  
You'll live your life a slave  
You'll love your servitude

We'll medicate your pain  
With our technology  
We'll always keep you safe

The nightmare unfolds before my eyes  
I will resist 'til end of time  
A spirit born free  
Has to break these chains  
We're lost, we must find our way  
We'll find our way!
