

Anti Social Disease

Impellitteri

Anti social is my name, no rules apply to me
I live the law that this man will be free
Stick's and stone's may break these bones, so call me what you
see
I give myself all the praise that I need

I stay alive with the voice in my brain
I stay alive with my anti social ways

Anti social, my disease, anti social

Don't tell me how to think your way, 'cause your rap don't matt
er to me
You need control over him over me
I don't kiss ass and I ain't your slave, so get the fuck away f
rom me
I rock to the music that's inside of me

You stay alive with the voice in your brain
I stay alive with my anti social way
Anti social, anti social, anti social, anti

Anti social disease, it's you or it's me
Anti social disease, your rules ain't for me
Anti social disease, we live to be free
The rebellion in me, it's my history
Anti social disease, it's you or it's me
Don't you like what you see, your rules ain't for me
Anti social disease, we live to be free
The rebellion in me, it's my history
