Save Me

Save me

So save me Here's a hammer Build a ladder It's a long way up to heaven If I dig it might take as long But maybe in hell that's where I belong Seven days and seven nights Funny he found the fires And I have walked this path before I'm afraid I'd lose it all Somebody save me Somebody save me I've been trying so hard But who can't see that far So save me Just let it rain I rather stay away From laps on the comet And the company of gross Memories they fade But I'm far too awake Welcome to my dream I'm afraid I'd lose it all Somebody save me Somebody save me I've been trying so hard But who can't see that far So save me [2x] So save me (Save me) Just let it rain I rather stay away From laps on the comet And the company of gross Memories, they fade But I'm far too awake Welcome to my dream I'm afraid I'd lose it all Somebody save me Somebody save me I've been trying so hard But who can't see that far So save me Save me (Save us)

In Flames

(Save us) I've been trying so hard But who can't see that far So save me Save me [4x]
