## Isn't It Scary

I know a place where we can get it on good, baby As far away, far away baby, from the world and all the city lights If you're not scared to get away From the normal things, from the normal dreams

And you're not thinking about your man at home Just me and you alone Ain't it scary, baby

Isn't it scary How you're here with me And not with your man at home

Isn't it scary How you're here with me And not with your man at home Me and you alone

And baby, baby, baby, baby Don't you see this love runs deep in me, baby Pretty lady, oh girl I feel too good to feel guilty

I'm sorry for nothing Except that I'm not with you for good And if I could, if I could, yeah I'd make you mine, oh mine Now aren't you scared

Isn't it scary How you're here with me And not with your man at home

Isn't it scary How you're here with me And not with your man at home Me and you alone

Isn't it scary How you're here with me And not with your man at home

Isn't it scary How you're here with me And not with your man at home Me and you alone

Isn't it scary How you're here with me And not with your man at home

Isn't it scary How you're here with me And not with your man at home Me and you alone

Isn't it scary
