

# Release

Khanate

I've got a bone to pick  
Maybe it's yours  
Someone said  
If you worked hard enough  
Ran fast enough  
Learned enough  
You would amount to something  
Fail  
Trying is not enough  
I'll hold you way too long  
It's cold when I touch you  
A release  
And everything you are is on the ground  
Broken open and spilling  
Leaves soak they drink  
You are blood  
That's all  
Fail  
Trying is not enough  
I'll hold you way too long  
It's cold when I'm near you  
A release  
And everything you are is on the ground  
You are blood  
That's all  
Blood  
Fail  
Trying is not enough  
I'll hold you way too long  
It's cold when you're down  
Release  
And everything you are is on the ground  
Broken, opened and spilling  
Leaves soak they drink  
You are blood  
That's all  
Fail  
Trying is not enough  
I dragged you too far down  
It's cold when I release blood  
A release  
And everything you are is on the ground  
Broken open and spilling  
Leaves soak they drink  
Blood  
Fail  
Trying is not enough  
I held you way too long  
It's cold when I'm near you  
A release  
And everything you are is on the ground  
And everything you are is broken  
Opened and spoiled the body  
Fail  
Trying is not enough  
And there I am above you  
I won't let go

It's cold when you are down  
It's cold when I touch you  
And there I am above you  
Opened and spoiled  
You were blood nothing more  
Leaves were soaked  
You were blood that's all  
Opened and spoiled the body  
You are blood nothing more  
It's cold when I release blood  
It's cold when you're down  
I'll hold you way too long  
I won't let go  
It's cold when birds fall from the sky  
It's cold when I'm near you  
Fail  
Trying is not enough
