

# Blindside

Lightyear

Smoke screen up ahead  
Smoke screen up ahead  
And I know that you fled  
From the pain and subsidence of a ghost  
It was never said  
You fell upside  
Downside  
Blindside  
You're gonna start to fall off the edge  
Like a lump of lead

I throw a reason and you throw it flying back to me  
Complicated out of sight, was it meant to be?  
Another time  
Another place  
Open smiles on her face  
And I'm sinking  
Can't stop thinking  
'Well just in case'

There's a hole inside of me  
And it's cut so clinically  
A lesson learned  
And no regrets

There's a hole inside of me  
And it's cut so clinically  
A lesson learned  
And no regrets  
(For me)
