

# Light Is Only Light

Lórien

A ray comes in  
Through the window pane  
The sun makes your mind clear  
A calm, a peace  
Flows from your chest  
Time stops for a while, round me

But when the darkness makes you blind  
You can't find the way  
The same things, the same place has been changed

The truth, a lie  
Same thing, different sides  
What do you really want?  
If you don't know  
What you are looking for  
Just go...go...go on

Don't be deaf don't be blind  
When the light fades away  
Light is only light just feel it?

Don't be afraid, don't be scared  
Only one thing has changed  
Your eyes are not your guide  
Feel your heart  
You still have the power  
You still have the staff  
Remember everything  
Is the same
