

# Watch Out!

Lovex

Watch out, watch out!  
Watch out, watch out!

Empty streets and distant voices  
Approaching steps give you no choices

You cannot hide you gotta run  
Give up the fight it cannot be won

You're on you're own

You'd better  
Watch out, look out  
It's right in your footsteps  
Watch out, right now  
It's breathing on your neck  
When you look behind  
No one's around  
It tricks your mind  
You'd better watch out, watch out!  
Watch out, watch out!

You don't know where it's coming from  
You try to see, it's already gone

And late at night outside your house  
You hear a sound but no one is around

You're on your own

You'd better  
Watch out, look out  
It's right in your footsteps  
Watch out, right now  
It's breathing on your neck  
When you look behind  
No one's around  
It tricks your mind  
You'd better watch out, watch out, watch out!

Wherever you look, it's out of your sight  
It's like the mirror of your inner fright  
Is it real or make believe  
It follows, follows you

Watch out, watch out!  
Watch out, watch out!

You'd better  
Watch out, look out  
It's right in your footsteps  
Watch out, right now  
It's breathing on your neck  
When you look behind  
No one's around  
It tricks your mind  
You'd better

Watch out, look out  
It's right in your footsteps  
Watch out, right now  
It's breathing on your neck  
When you look behind  
No one's around  
It tricks your mind  
You'd better watch out, watch out, watch out!
