

# Move Along

Lower Than Atlantis

From the outside looking in  
You can barely hear my voice  
I could be someone if you gave me half a chance  
From the inside looking out  
Maybe you'll hear me if I shout  
We will be something big and that I do not doubt

We will...

Move along, move along, move along  
The race of the rats is almost over  
And you're too late  
You're coming in last, we're in first place

From the upside looking down  
We're just another band from another town  
This band is not just a band to us  
This is a way of life

From the downside looking up  
Fingers and toes crossed for luck  
I believe we will achieve  
Because we want it bad enough

We will...

Move along, move along, move along  
The race of the rats is almost over  
And you're too late  
You're coming in last, we're in first place

Move along, move along, move along  
Been going strong for four years now  
And we're picking up pace  
It's here, it's now, it's in your face

You can make charts and we will play  
You reminisce about the industry yesterday  
You haven't got much to say  
So we will take what you give  
And we'll do what we're doing anyway

Move along, move along, move along  
The race of the rats is almost over  
And you're too late  
You're coming in last, we're in first place

Move along, move along, move along  
Been going strong for four years now  
And we're picking up pace  
It's here, it's now, it's in your face
