

# The Rage to Overcome

Machine Head

This world does not want me  
This world does not care  
And I am a product of this world  
Confused, I'd say that's fair  
This pain will never leave me  
It's scared upon my brain  
Destroying everything that brought this  
Just to keep me, just to keep me sane

A hatred burns inside me  
Emotion out of hand  
But I've the will to focus this  
Survive, contrive, command  
From pain come a courage  
The strength from injustice  
The rage to overcome it all  
An open mind  
With a closed fist
