

Eugenics

Malignancy

Reproduce perfect progeny, advanced - socially -
mentally

Emphasis on controlled re-growth, meticulous -
convergent evolution.

Transgressive meddling

Are they the new race?

Projects that redefine mankind

Foolish ventures, substantiate a lie.

Candidates for our legacy.

Modified genetics, retooling, testing the unknown

Theoretical not proven, participates of average
mentality - physicality.

Transformed on a cellular level that defies creation.

Indemnify these vessels of greatness.

Maintaining a strict blueprint for the enlightened.

Relegated subjects suffer in anonymity.

Fortified in this tomb surrounded by strangers

No conception of day or night, depressive thoughts

Apprehensive, restless, drained of strength

Guilt ridden for leaving loved ones behind

Fearful and broken, experience debilitates

Agony of unknowing. Is nothing left?

Already divided, taking sides in defiance

Suggesting violence siphoning of wills

Intellectuals attempt a peaceful resolution

The seeds have been planted.

Extroversion is the only way

Subduing the anger, allowing the trust, coexistence
instead of death
