

Carbon Place

Mando Diao

Take you back through the suburb Catch the train I've been pain
ting your pipeline We're so proud of you leaving him back home
And the money at gate night Why so sad and disordered? The doct
or never lies I've been planning for you to sleep in here

With guardians and angels who sleep for the summer And drinkers
and loners who lives through the night The present is given by
those who stands near me I wait for my shadows to swallow my h
ead The sun in carbon place is grey

Now teach the drummer to dance like ballet girls They've been s
tanding for hours There's the strip that they named me Smelled
compelled They believe that it guides them So you lives in a ca
rbon Doctor never lies And all my saviours have lost their way
in here

With guardians and angels who sleep for the summer and drinkers
and loners who live through the night The present is given by
those who stands near me I wait for the shadows to swallow my h
ead The sun in carbon place are never what they say I walk the
hills of living deads and fade away, away, away...

The broken good fellow The guardians and angels which sleep for
the summer and lives in the night The present is given by thos
e who stands near me I wait for the sorrow to swallow my head

With guardians and angels who sleep for the summer And drinkers
and loners who lives in the night The present is given by thos
e who stands near me I wait for the shadows to swallow my head
The sun in carbon place The sun in carbon place...
