

Everyone Everywhere

New Order

At the end of the day there's no food on our plate
So we beg and we steal for we know love is real
And if we don't take a chance in a spare sideways glance
These are all the chains I wanted to justify the things I do
And when we kiss we speak as one
And in a single breath this world is gone
And when we kiss we speak as one
With a single breath this world is gone
It's a crisis I know at the end of the show
People change but we don't falter 'cause we know love is real
This is no place to shiver so get up off the grass
You were once the main attraction but all that's in the past
How much is free for me and you?
I'm on my knees, I am a fool
But when we kiss we speak as one
With a single breath this world is gone
This world is gone
How could I fail to give her when she cried such a lot?
People change but we don't falter 'cause we use what we've got
And when we kiss we speak as one
With a single breath this world is gone
And when we kiss we speak as one
With a single breath this world is gone
This world is gone
This world is gone
This world is gone
