## Ours

The walls they've built, we've broken Watch them fall before her night Taken our whole family Built this dumb catastrophe Never satisfied but keeps it all inside Eating away at her time When all we've had was stolen How could we have never found They've taken morals, made them wrong And put them where they don't belong Never satisfied but keeps it all inside In his heart, he's thinking that he's ours Teach him to be ours In his heart, well he couldn't ever find 'Cause he might take his life Teach him to be ours In time In time we've seen walls getting broken As I stand here and watch them fall Before her eyes When all that we've had was All that we've had was stolen How could we ever find another life? And then one day all we would find That mommy's has finally lost her mind Never satisfied she keeps it all inside In his heart he's thinking that he's ours Teach him to be ours In his heart well he couldn't ever find Cause he might take his life Teach him to be ours He might find out He might find out He might find out He's not ours Well please don't let him Please don't let him Find out Please don't Well please don't He'll take his life Yeah he'll take his life If he finds out If he finds out If he finds out He'll take his He'll take his life
