

# I Know You Want to Stop

Placebo

I know you want to stop  
There is no return from this point on  
Be glad for what you got  
Maybe you won't take too long to burn

I recognize the smile  
There are some things I cannot forget  
It may be for a while  
I'll pretend that we have never met  
We have never met  
We have never met

And maybe we will part  
Will your paranoia keep you warm  
I'll eat it from your heart  
I will still enjoy to watch you fall  
The credit starts too low  
We take off our clothes and roll around  
Boredom takes its toll  
It shall be your eyes that let you down  
Eyes that let you down  
Eyes that let you down

You're still  
You're still  
You're still  
Still...

I know you want to stop  
I know you want to stop  
Stop

You're still  
You're still  
You're still  
Still...

You're still  
You're still  
You're still  
Still...

I know you want to stop  
Stop!
