

Quarantine My Heart (Baby)

Powerspace

We don't need a party
just a place to meet
My mind is still racing while the city sleeps
But I don't complain
Cause I know we're okay
Race against the clock
Running on no sleep
When there's no time to rest
and there's no need to dream
Cause when your with me
I feel like I'm dreaming
I hang out and hold on
(and count the days til I come home)
I can't brave this alone
Quarantine My Heart Baby
In someone elses arms, I feel unhealthy
How can we survive and finally live our dreams
In a world filled up with players on opposing teams?
Darling how can I go on?
Sing me one more song
Not even an hour on the interstate
Such an unforgetting journey
An eternal wait
And I hit the cruise control
There's a swelling in my soul
It's so good
I speed up and get home
To find you again
Quarantine My heart again
In someone elses arms
I feel unhealthy
(So never let me go)
If I can't feel your heart beating
I might as well just write off love completely
Clogging up my mind, gotta get out
Open my mouth and let it out
I've tried and trust me,
It's not the same with anyone but you
I swear to God it's true
Quarantine my heart baby
In someone elses arms
I feel unhealthy
(so never let me go)
If I can't hear your heart beating
I might as well just write off love completely
Check my pulse I think I've had too much baby[oooooh]
