Yeah... I'm saying we went from Gods to niggas From queens to bitches Who in the hell told you that you were in heaven Who in the hell told you that you were in heaven Platinum gold a house and a car But poverty all around you by far People living under bridges or in a car Heaven for the super rich who call it modern living But the Man from the east calls it a wilderness Cause heaven for whites is hell for blacks in america Heaven and hell are two conditions of Life Not a place up there or a place down there It's a condition of life on earth so value Life Heaven is not things It's a higher level of thinking And at the moment one may change the conditions of Life Our people think a job, partying and endless flow of women and moet, Krystal and how much sex you can have is heaven Sometimes you got to think that it may not be heaven all the time But being able to meet Life's struggles head on, head on, head on Without compromising your Soul soul soul In this worlds Life Not Life after death Life on earth Life Not worrying about how you are gonna eat or put clothes on your children Sit yourself in heaven at once A woman is a very important part of heaven She produces heaven with you And if she is connected to the source of Life

So heaven is a condition of Life And you can have it on earth SO VALUE LIFE

VALUE LIFE

Who in the hell told yall you were in heaven Oh. Oh
