

## Red Money

Razor

I don't think you realize the way things really are  
Play with fire, burn yourself, you let things go too far  
Now you come to me and say that you can't pay your dues  
You've been warned 1000 times so now you're going to lose

Fool, you know you've got more debts than anyone I've met  
Compound interest paid in blood, cause loan-sharks  
don't forget... Where you live

Skippping town will do no good. I knew you'd try to deke  
Sent my friends to follow you and now you're up shit's creek  
You can't con a con man, there's no point, you're going down  
If you've got the money then pay up, don't fuck around

If they have to kick your ass. you've got yourself to blame  
You didn't have to come to me for cash to play your games  
I'm just another businessmen, I've got my job to do  
Pay back what you borrow or they'll break your legs in two
