

When we go home keep to ourselves
From all those gutter eyes
Ending down in the ground because it always was
And it always is
The shadow we come out and it helps with our outside

You can have the knowledge
All the things you learn in the college
You can have the knowledge
All the things you learn in the college
You know we've already judged
We've already judged
We did, we did, we did

You know you can't go home kicking yourself
Until you know some and you can't live anymore
And through the darkest turns and laying more lies
That eats away as if the sun burst from the style

You can have the knowledge
All the things you learn in college
You can have the knowledge
All the things you learn in college
You know we've already judged
We've already judged
We did, we did, we did
I can get myself down oh, that I owe
Can't find my own
I can't find, I can't find.
