

## Wait It Out

Sarah Blackwood

If you keep leaving out  
Fill that pretty little head with doubt  
And doors keep slamming at your back  
Close your eyes but can't forget about the past

And he said "Darlin' wait it out. The pain will lessen then come back around. But these hearts won't hold you to the ground. What's been lost can someday be found."

One day my love you will know  
This whole time I've been on my way home  
Back to you to unbreak my soul  
I've got diamonds worth of damage from this road

And he said "Darlin' wait it out. The pain will lessen then come back around. But these hearts won't hold you to the ground. What's been lost can someday be found."

Take some time to throw them out  
See what you find, it's too loud  
There ain't no time to crumble now oh no not now  
I wish it were as easy as it sounds

And he said "Darlin' wait it out. The pain will lessen then come back around. But these hearts won't hold you to the ground. What's been lost can someday be found."

And he said "Darlin' wait it out. The pain will lessen then come back around. But these hearts won't hold you to the ground. What's been lost can someday be found."

What's been lost can someday be found."
