

Into the Night

Seelennacht

The sun goes down and all the dark prevails
Like those hidden memories
The rain which is falling from the sky
Creates a mournful scenery
Like a frozen angel in the sky

The lanes are cold and they're left in silence
For another dawning night
The gates of eternity are open
We leave our memories behind
Only for a moment

Und so sprachen die Propheten, dass von diesem Tage an
Finsternis über die Menschheit hereinbrechen würde

Follow me into the night
And all your dreams are coming true
Like a storm wind that never dies
We will stay in eternity

Follow me into the darkness
Seduced by pleasures of blackened love
On these wings of eternal fate
I will always be with you

On the sky's a black horizon
And we're descend into the void
We spread our wings into this cold room
Where we go into the night
Until we'll leave reality

They want to tear us, they want to break us
I hear the echoes from behind
We are leaving the gates of hell
Now we are free again
Are we really free again?

Fearing the end
And numb inside
