

Pretty World

Sérgio Mendes

Why don't we take a little piece of summer sky
Hang it on a tree
For that's the way to start to make a pretty world
For you and for me
And for the sun we'll take a lemon bright balloon
You can hold the string
Oh can't you see that little world of ours will be
The prettiest thing
We can gather rain enough for the stream
To hold our happy faces
When we want a breeze, I'll blow you a kiss or two
Take me in your arms and our little world
Will be the place of places
Nothing left to make but breakfast and love
We'll hang a little sign that just says Paradise
Population two
For that's the way to start to make a pretty world
For me and for you
For you
It's what I wanted to do, to do
To make a world
