Scientist

SONOIO

These are not the droids you're looking for
This is not my room behind that door
Changes come and make you incomplete
Chances gone I'm running to deplete

Catch me falling if you can
Remembering the things you said
It doesn't take a scientist
To see that I've been going nuts
Catch me falling if you can
Remember everything I say to you

These are not the droids you're looking for
This is not my room behind your door
Changes come and make you incomplete
Chances gone you're running to deplete

Catch me falling if you can
Remembering the things you said
It doesn't take a scientist
To see that I've been going nuts
Changes hurt, but it's okay
Another goddamn cigarette
It doesn't take a scientist
It doesn't take a scientist
Maybe everything will end
Another random universe
God left long ago
Leave a message at the tone
It doesn't need to end like this
It's always worth remembering
It doesn't take a scientist
It doesn't take a scientist
