

Trepidation

Stillwell

Nothing ever saves me, always seems to break me down
Trepidation chase me, take me down and waste me

Want to run with the glorified run along
Want to run with the odd ball come along
Want to feel how it feels to be the one out
How it feels to be the one everyone doubt
Want to see the way I fall in a bad trap
Want to see the way I crawl with a stabbed back
Want to hear the way I'm going to lie for the wealth
Want to hear the way...

Nothing ever saves me, always seems to break me down
Trepidation chase me, take me down and waste me

Always seems to get the best of me, always seems to get the best of me

Always seems to get the best of me, always seems to get the best of me

Want to walk away leaving with a bad taste
Want to play the game and always be in last place
Feeling like you always find out too late
Can't believe in what you're seeing so you loose faith
Want to stop and get off the devil's hit list
Want to stop before you end up with a slit wrist
Want to trade the new truth for an old lie
Want to know why...

Nothing ever saves me, always seems to break me down
Trepidation chase me, take me down and waste me

Come along now, run along now, come along now run along now!

Find me, see me, save me, Find me, see me, save me
Find me, see me, save me, Find me, see me, save me
Come along now, run along now, come along now run along now!
