

## Forever

Suffokate

welcome to my shadow I've been here forever  
waiting on your presence still i stand unbroken  
i have always believed this and you were so fucking cruel  
in your darkest of hours you will be waiting alone  
[4x] power-molds-static [2x] static  
Dark trials dark trials  
and your wounds they make me numb  
my fatal shot  
cause i have a war in me-overlooked for so long  
and the cost is your life its done  
a mainline,a function  
the joy of dishonor-bleed for the weak one  
that made you hollow in life-hollow in life  
i have waited for so long  
[4x] fatal shot  
my fatal this fatal the fatal shot
