

## Let's Just Sing

Support Lesbiens

I'm slightly white feeling the darkness behind me  
I'm slightly black tasting the hatred around me  
The candle's red and when it burns it goes yellow  
So why envy and even being so jealous

Come on and let's just sing tudututudututu blues  
And groove is from the black printing foot  
The truth and shoes is what they already knew

I'm talking about the love and the lonely ones  
Truth and shoes won't feed anyone

We'd better feel instead of seeing and killing  
We'd better feel instead of seeing and killing

I'm talking about the love and the lonely ones  
Truth and shoes won't feed anyone

Just sing tudututudututu  
Do you know, don't you know all of this sucks  
So do you know, don't you know we will never grow  
Do you know, don't you know drop the little gun  
So I will know that you know  
Still we'll never grow

We'd better feel instead of seeing and killing  
We'd better feel instead of seeing and killing

I'm talking about the love and the lonely ones  
Truth and shoes won't feed anyone  
Just sing tudututudututu
