

Red Tide

The Growlers

The summer is here
And the red tide's near
The day breaks brown
But when the sun goes down
The faces shine bright
Through the whole night

Her glow hypnotizes
As the sea drops and rises
Red tide come alive in the night red tide
Come alive tonight

I kick the crystals into the sky
I don't stop to ask you why
Red tide
Friend of the moon
You come suddenly and leave too soon

Red tide, red tide come alive
In the night red tide
Come alive tonight

I was beckoned from the western shore
I couldn't hold my spirit anymore
No legend could scare me still
I give in let go and drift

First glance and you drew me near
To the sand with the distant fear
A midnight flash it doesn't last
I have to wait until the seasons pass

I was beckoned from the western shore
I couldn't hold my spirit anymore
No legend could scare me still
I give in let go and drift

Red tide, red tide come alive
In the night red tide
Come alive
Red tide
Moonlight
