

# Big Brother's Still Watching

The Tubes

The silent horde  
Comes creeping through the night  
Shuns the lights and cameras  
Staying out of sight  
We've been warned  
There's no one else to blame  
Take your medicine  
Before they take your brain

I can't believe there's no one listening  
Talking heads explain  
The latest new reform  
You won't get much to say  
Until you've been reborn

Look at the eyes there's something missing  
Don't you think it strange  
How they only change the name  
Where's the open door  
Well it's on the thirteenth floor  
I know you've heard it all before

Big Brothers watching us  
With eyes in the sky  
I think I've had enough of asking why

I know they're still watching us  
No where to hide  
It's time to turn and fight for your life

All the time you spent  
Hiding in the dark  
Take your poison pen  
And stab it in their heart

That may arouse a slight suspicion  
Don't you think it's weird  
'til they passify your fears  
Change the right to wrong  
And we follow right along  
The bouncing ball will lead us on

Big Brothers watching us  
With eyes in the sky  
I think I've had enough of asking why  
I know they're still watching us  
No where to hide  
It's time to turn and fight for your life
