

# Crash Landing

The Verve Pipe

All of the places we once shared  
They don't feel the same without you  
Our favourite song that plays on the air  
But it doesn't sound the same without you

I'm hearing words noone spoken  
And I can feel my heart beat  
Though I know it's broken  
Nothing is the way it seems  
Like being awake in a dream

And now you're gone and I'm standing  
In the middle of the room crash landing  
I've got my feet on the ground  
But it feels like falling down, down, down  
I'm crash landing

How can something be at the end  
But feel like it's going on forever  
So many things you rush to attend  
And when you're there it's just the next whatever

Surrounded by friends but still lonely  
Millions of hearts aching but mine's the only one  
That can't come back from this  
It's a slap when you expect a kiss

And now you're gone and I'm standing  
Right in the middle of the room crash landing  
I've got my feet on the floor  
But it feels like falling down, down, down  
Since you haven't been around, round, round  
I'm crash landing

And the stars they've been bright under this bright night  
And the...

Nothing is the way it seems  
Like living awake in a dream

And now you're gone and I'm standing  
Right in the middle of the room crash landing  
I've got my feet on the floor  
But it feels like falling down, down, down, down, down  
Since you haven't been around  
And now you're gone and I'm standing  
Right in the middle of the room crash landing  
I've got my feet on the floor  
But it feels like falling down, down, down  
Since you haven't been around, round, round
