

Siphon the Bad Blood

Thomas Giles

Dont bear your neck to the wolf
put your head underground
Our young worship the youth
put your hands underground
Sink this house and get out now
the winds come whispering in
Sink this house and get out now
the waves crush all within
No one leaves this world alive
No one leaves this world alive
Switch off this morbid thought
put my feet underground
A crushing chest from the fog of time
put my mind on the ground
Sink this house and get out now
the winds come whispering in
Sink this house and get out now
the waves crush all within
No one leaves this world alive
No one leaves this world alive
No one leaves this world alive
