## **Light Up or Leave Me Alone**

**Traffic** 

Sometimes I feel like I'm fading away You're looking at me, I've got nothing to say Don't make me angry with the games that you play Either light up or leave me alone

You walk in my room, you lie in my bed You open your mouth, shoot someone dead All of a sudden you're inside my head Either light up or leave me alone

Spending my bread like it grew on a tree You're trying to tell me 'bout the birds and the bees The skirt that you're wearing is way past your knees Either light up or leave me alone

You're up all night preaching your mind
Come home in the morning with your latest find
I'm gonna have to lay it to you straight on the line
Either light up or leave me alone
